

APPLE DISTRIBUTION STOCKS

This module is used to check the availability of Apple distribution products.

- **Filter Options:**

You can filter by product and select the warehouse(s).

- **Availability View:**

The system shows the available quantity in the selected warehouses. Next to the quantity, an **“i” (info) button** is available, which displays detailed stock breakdowns:

- **Physical:** Quantity physically available in the warehouse.
- **Allocated:** Quantity scanned or reserved in orders, but not yet packed.
- **Committed:** Quantity scanned and packed in an order.
- **Booking:** Quantity reserved for an order where stock is insufficient, so it is on hold.

- **Export Option:**

You can export the availability data to Excel by clicking the **“Export to Excel”** button.

Revision #3
