

Product Management

Product Management is used to manage product details, visibility, pricing, and availability across warehouses.

Navigation

1. Go to **Product Management** → **Product Management**.
2. Use filters to search for the required product.
3. Select the **Warehouse** to check product availability.

Steps to Edit a Product

1. **Locate the Product**
 - Filter/search for the required product.
 - Select the warehouse to check availability.
 - Click **Edit** next to the product.
2. **View Product Details**
 - Review all existing product information.
3. **Make Updates as Needed**
 - **Edit Product Description** – Update or correct product details.
 - **Add Prices** – Enter prices across all applicable modules:
 - OMS
 - Purchase
 - Rehandle Pro
 - Live Auction
 - Closed Auction
 - **Manage Product Visibility** – Use the toggle button to control visibility.
 - If the toggle is **off**, the product will not appear in OMS.
 - **Upload Product Images** – Add or replace images for better visibility.
4. **Save Changes**
 - Click **Update** to apply and save all edited details.
