

# Used Phone stock

This module is used to check the availability of **Used Phones** across warehouses.

## Filter Options

You can filter the data by:

- Product
- Model
- Storage
- Other available attributes

## Availability View

The system displays the available quantity in the selected warehouses. Next to each quantity, an **“i” (info) button** provides a detailed breakdown:

- **Physical**: Quantity physically available in the warehouse.
- **Allocated**: Quantity scanned or reserved in orders, but not yet packed.
- **Committed**: Quantity scanned and packed in an order.
- **Booking**: Quantity reserved for an order where stock is insufficient, so it is kept on hold.

## Export Option

You can export the availability data to Excel by clicking the **“Export Product to Excel”** button.
